# Accredited certification and inspection

Product certification or inspection: rolling stock and their parts, railways and railway components within the meaning of Act No. 266/1994 Coll. on railways. At the request of the manufacturer, importer or another person, VUZ carries out Certification as the accredited activity to the extent specified in the Certificate of Accreditation for the Certification Body for Products accredited by ČIA no. 3149 (COV) and Inspection to the extent specified in the Certificate of Accreditation for the Inspection Body accredited by ČIA no. 4056 (IO).

The provided services may be within the scope of flexibility extended beyond the scope of accreditation mentioned above. VUZ certifies production quality systems through a non-accredited quality management certification body.
